INVENTORY MANAGEMENT

The Simple Solution for a Complex Process

 **Improve Efficiency & Productivity**

 **Increase Profits & Control Cost**

 **Control Your Inventory**

TFG4000™ Inventory Management allows you to save time and money, while increasing your profits and controlling costs. The application manages your inventory by providing the ability to define every item in your inventory quickly and easily, build product structures (BOM), create a variety of reports, and track inventory activity. The system is user-friendly, requiring minimal keystrokes. Now you can monitor your inventory more efficiently, thus providing you greater productivity.

Take Control of your Inventory with...

Reduced Lead Times:

Automatically maintains on-hand quantities, which decreases the risk of shortages or extended wait time for orders.

 **Customized Reporting:** Choose from more than 15 reports and customize them to meet the needs of your business.

 **Monitor Shelf-Life & Expiration Dates:** Allows you to control your inventory by monitoring shelf-life and expiration dates for various inventory items.

Track Flow of Parts & Supplies with Greater Control:

Automatically maintains audit trails and on-hand quantities allow for better monitoring of parts and supplies.

 **Built-In Help Features:** Built-in help features at both field and screen level provide immediate assistance.

 **Optional Security Features:** You have the option to engage full security features within the system at your discretion.

Key Features

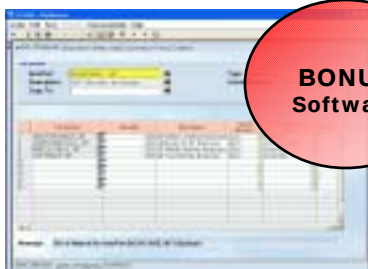

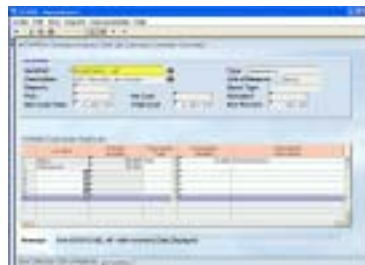

ITEM

- Define an item to represent physical material or to identify services
- Establish items by entering as little or as much as you desire
- Enter basic cost, set price and apply discounts
